

New Digital Thermostat

- Sleek design
- Greater control over set temperature
- Will accept choice of decorative frames
- Plug compatible with existing thermostat
- High quality tactile buttons
- Configurable to different heater models
- Built in countdown timer

Acoustic Ducting

For installation requiring greater levels of noise reduction we are pleased to be able to offer this Technical Acoustic Ducting.

The ducting is manufactured from a semi porous material that will absorb a wide range of frequencies from 50 – 500 Hz. Test have shown that maximum effect will be gained when using 1 metre of ducting and this should be positioned anywhere within the ducting run between the heater and first outlet..

Available in 1 metre sticks
